PART 1 · THE PROBLEM

Price Disparity & Market Fragmentation

ACROSS APPS & PAGES

Arbitrary Disparity

Identical items sell at conflicting prices across social media pages and apps (e.g., Miswag, Simma).

INSIDE PLATFORMS

Intra-Platform Chaos

Duplicate listings for the exact same SKU appear on multi-seller platforms like iBazzar with inconsistent pricing.

DIRECT MESSAGES

The "How Much?" Friction

Buyers waste hours in repetitive direct messages without price clarity.

PART 2 · THE SOLUTION

Cheapify: Transparent & Smart Commerce

SINGLE SKU

Unified Product Pages

Aggregates every seller under a single product card, eliminating duplicate clutter.

FAIR RANKING

Best-Price Prioritization

Automatically displays the lowest price and highest-rated verified seller first.

SMART PRICING

Live Merchant Alerts

Alerts sellers when competing listings drop lower, driving organic fair deals.

PART 3 · TARGET CUSTOMERS

Who Benefits: Shoppers & Local Merchants

Everyday Deal-Seekers

Consumer Segment (18–35 Years Old)

- **Behavior:** Everyday online shoppers, savvy deal-seekers, and budget-conscious buyers.
- **Demographics:** Young adults and working professionals across major Iraqi & KRI cities.
- **Goal:** Transparent price comparison in seconds without overpaying or endless DMs.

Local Retail Merchants

Physical Store Owners & Social Media Shops

- **Audience:** Small & medium retail stores seeking digital order volume.
- **Pain Point:** Custom e-commerce apps are too expensive to build and maintain.
- **Goal:** Ready-made digital storefront with steady buyers and no heavy cuts.

PART 3 · VALUE PROPOSITION

Clear & Measurable Value Across the Market

FOR SHOPPERS

Guaranteed Savings

Saves money instantly, avoids retail markups, and eliminates hours spent messaging sellers.

FOR MERCHANTS

Sales & Reach

Instant access to active buyers, automated order management, and live pricing insights.

FOR THE MARKET

Standardized Trust

Replaces chaotic direct messaging with dependable checkout, courier integration, and ratings.

PART 4 · BUSINESS LOGIC

Delivery Operations & Revenue Model

Fulfillment & Operations

Lean Logistics Infrastructure

- **In-House Platform:** Architecture built directly by founder, keeping dev costs low.
- **Courier Integration:** Local dispatch partners handle merchant pickup and delivery.
- **Local Payments:** Seamless Cash on Delivery (COD) plus FastPay, FIB, and Qi Card.

Revenue Generation

Tiered Pricing Model

- **Active Tiers:** <9k IQD (5%) · 10k–99k IQD (Flat 1,000 IQD) · 100k–499k IQD (2%), etc.
- **Fair Adoption Model:** Replaces heavy platform commissions to accelerate sign-ups.
- **Growth Streams:** Featured product placement and merchant analytics.
