Cheapify

A Smart Multi-Seller Marketplace for the Iraqi Market

By: Shakir Bashar

Assignment 2

---

1. Problem statement

➔ People struggle with **buying items online** because **prices vary wildly across scattered social media pages, listings are messy, and buyers don't know who to trust.**

2. Customer

➔ The people most affected are **everyday online shoppers looking for fair deals fast, as well as local social media sellers who spend hours answering repetitive messages and coordinating deliveries manually.**

3. Possible Solution

➔ A useful solution could be **a single multi-seller app that gathers local products in one place, automatically compares prices side by side, and gives sellers a simple way to take organized orders.**

4. Value

➔ This would help them by **saving buyers time and money so they feel confident and safe, while freeing sellers from messy chat orders and helping them reach more customers easily.**
