Cheapify

A Smart Multi-Seller Marketplace for the Iraqi Market

By: Shakir Bashar

Assignment 3

Customer Persona: The Smart Deal-Seeker

- ➔ **Name:** Ahmad
- ➔ **Age:** 23 years old
- ➔ **Gender:** Male
- ➔ **Location:** Duhok (living with his family in an apartment/house)
- ➔ **Occupation / Specialization:** Final-year university student (majoring in Business Administration) who works part-time as an office assistant
- ➔ **Financial Status:** Moderate / Middle-class (budget-conscious; manages limited monthly spending money from his part-time wage and family support)
- ➔ **Shopping Behavior:** Active on social media (Instagram, Facebook, and TikTok); frequently buys daily items, tech accessories, study gear, and personal products online using Cash on Delivery (COD) or FastPay

Main Pain Point

- ➔ **Price Inconsistency & Waste of Time:** Ahmad often sees the exact same item priced with random 5,000 to 15,000 IQD differences across various Instagram pages. He has to spend hours messaging multiple pages via DM just to ask "How much?", waiting hours for replies, and still worrying if he is getting ripped off or overpaying.

Current Alternative

- ➔ **Manual DM Inquiries:** Scrolling through 4–6 separate Instagram/Facebook shops, DMing each seller to request prices, or walking through local commercial bazaars hoping he stumbles upon a fair deal without knowing market rates.
