Problem

Same power bank. 100,000 or 200,000 IQD.

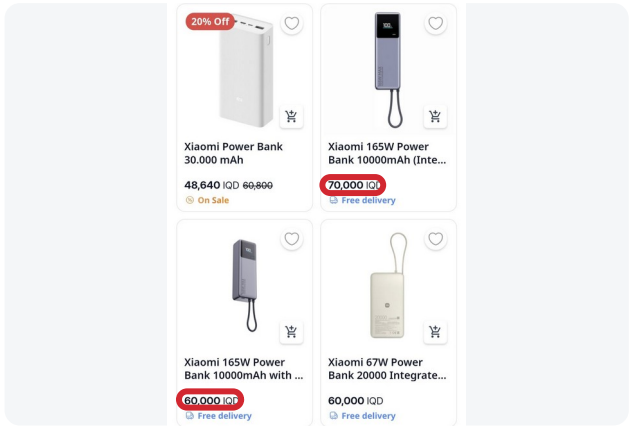

Miswag app — same search, same screen (Oct 20, 2026)

Live app listings captured Oct 20, 2026 (Miswag, iBazzar); Instagram offers from seller posts dated Apr–Oct 2026. Seller names blurred.

Problem · evidence

It's not one product. It's the whole market.

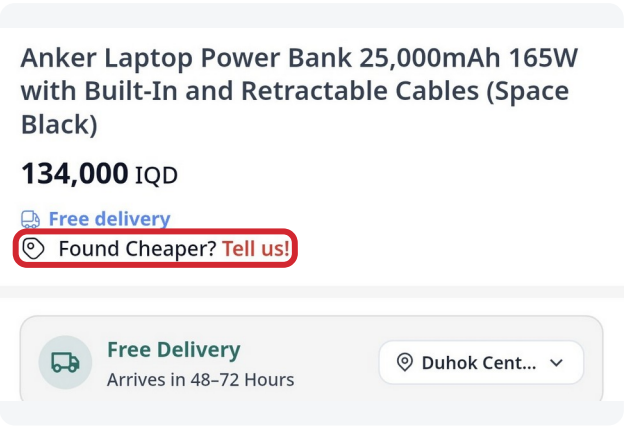

Same product, listed twice

iBazzar app · 60,000 vs 70,000 IQD

No price: 'call to order'

Instagram · a buyer asks: “How much is it?”

An app asks you to report cheaper prices

iBazzar app · “Found Cheaper? Tell us!”

97% of 179 surveyed shoppers notice big price gaps on the same item

55% of merchants pick answering “price?” messages as a top headache — the most common answer

Screenshots Sep–Oct 2026 (shop names and phone numbers blurred) · Cheapify market survey, n=199 (179 shoppers, 20 merchants), Sep–Oct 2026.

Solution

One product. One page. Every seller.

Anker Power Bank 25,000 mAh · 165 W

One page · every verified seller

Seller	Item	Delivery	Doorstep total	Arrives	
Store A · Duhok	92,000	+3,000	**95,000 IQD**	Today	BEST VALUE
Store D · Erbil	91,000	+5,000	**96,000 IQD**	1–2 days	
Store B · Duhok	99,000	+3,000	**102,000 IQD**	Today	
Store C · Duhok	121,000	+3,000	**124,000 IQD**	Today	

1. **Lowest doorstep total**
2. **Fastest delivery**
3. **Best seller rating**

Ranking can't be bought.

Value proposition

Shoppers save. Merchants sell.

For shoppers

Every price, side by side
No more checking ten pages

Order in 30 seconds
No “price?” DMs, no waiting

Cash on delivery
Doorstep total shown upfront

For merchants

Orders, not interrogations
Ready orders with address and variant

Free dashboard
Stock, orders and weekly payouts in one place

Fair, low fee
About 3.8% on a typical 25,000 IQD order

Business model

We earn only when an order is delivered.

Shopper pays 28,000 IQD at the door (25,000 item + 3,000 Duhok delivery)

950 fee + 500 delivery margin

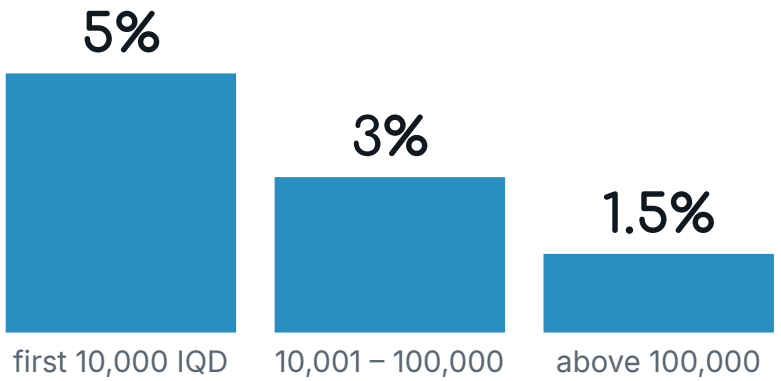

Merchant 24,050 IQD — keeps 96% of the item price

Courier 2,500

Cheapify 1,450

Our fee gets lighter as prices rise

≈ 1,100 IQD

kept per delivered order after messaging, failed-delivery and return costs

Example: 25,000 IQD item delivered in Duhok city; courier rate 2,500 IQD quoted by Fast Delivery (Duhok). The delivery margin applies once the courier contract is signed.

Growth strategy

Every merchant brings their followers.

≈ zero cost to acquire these shoppers

Phase 1 · Months 1–6

Duhok

20 founding stores · 3,000+ orders

Phase 2 · Months 7–15

Erbil · Mosul · Sulaymaniyah

75 stores

Phase 3 · Month 16+

All of Iraq

300+ stores

Founding stores: 0% commission in month 1 + free ads

german cooperation
DEUTSCHE ZUSAMMENARBEIT

CENTER FOR ACADEMIC AND PROFESSIONAL ADVANCEMENT
THE AMERICAN UNIVERSITY OF KURDISTAN

Financial feasibility

Break-even at about 20 orders a day.

~585 orders / month

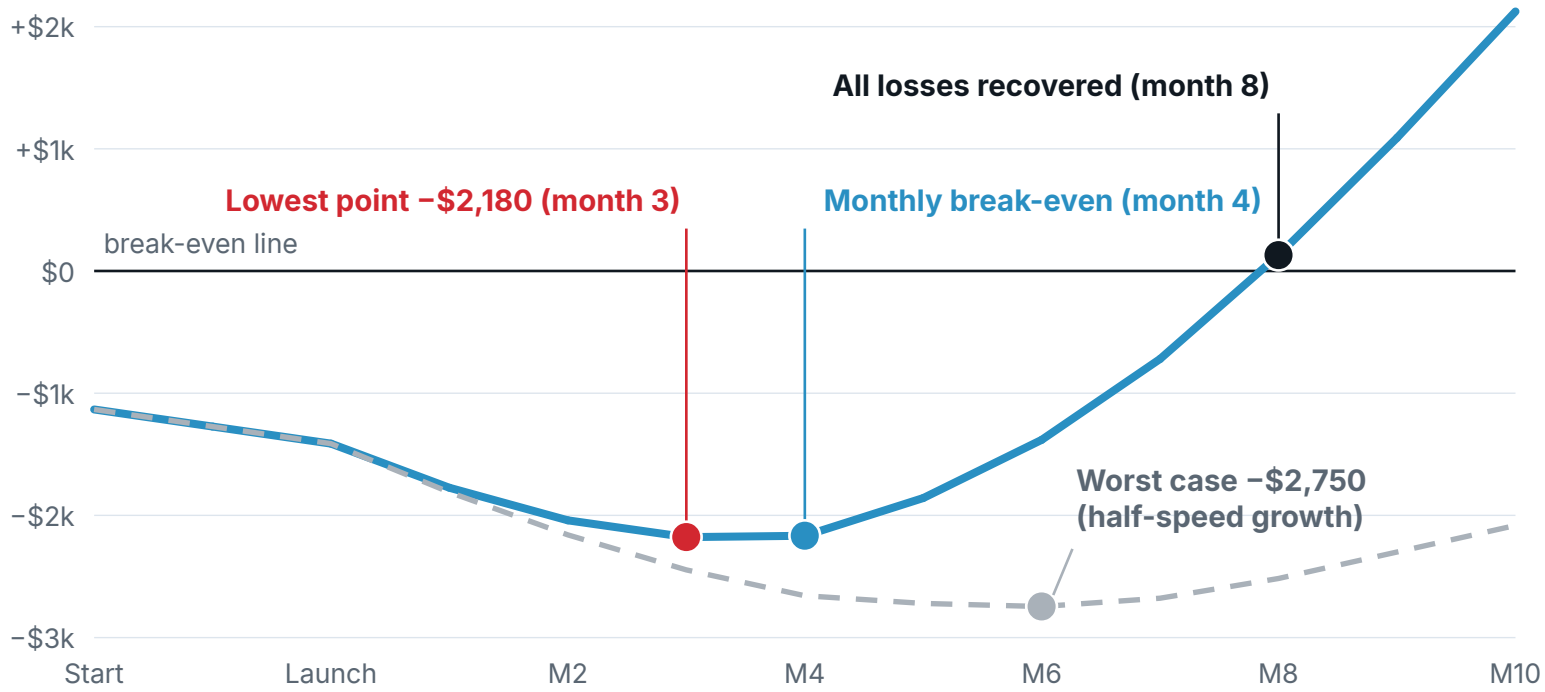

break-even · about 1 order per store per day

~1,115 IQD

kept per delivered order

Month 4

monthly break-even (planning case)

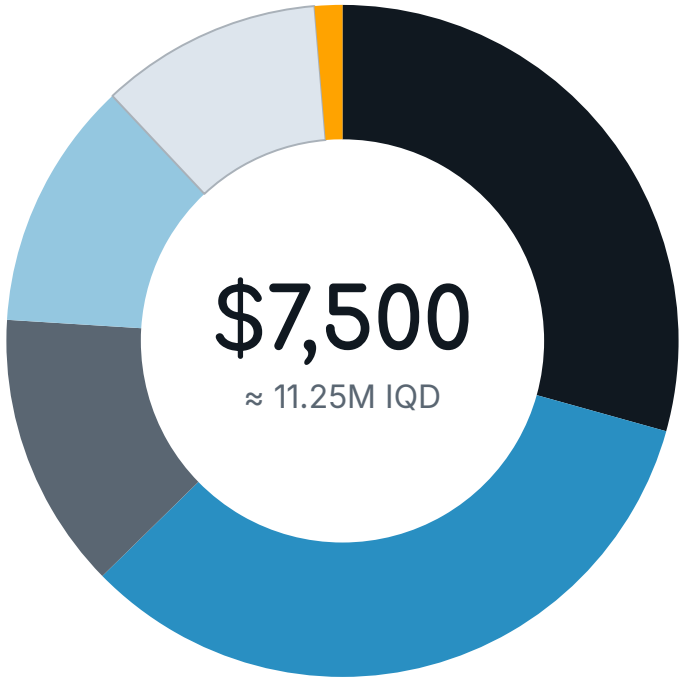

Planning case: orders grow 100 → 2,000 a month; costs 652,000 IQD/month after launch (790,000 from month 6); includes 1.7M IQD startup costs. Assumes 25,000 IQD average order and a signed courier contract. USD at 1,500 IQD.

Funding

$7,500 launches Duhok.

Launch gap (until break-even)	**$2,200**
Growth marketing	**$2,500**
Registration & legal	**$1,000**
Merchant kits & packaging	**$900**
Reserve	**$800**
Pilot test (10–20 orders)	**$100**

Every rank funds a complete plan

1st · $7,500
Full plan: launch + growth marketing

2nd · $4,500
Launch, registration and pilot; slower growth

3rd · $2,500
Covers the launch gap; growth stays organic

Built in-house: $0 to developers · $0 salaries
Founder in-kind contribution ≈ $9,500 (equipment + build time)

Appendix

Fee schedule: lighter as prices rise

5% on the first 10,000 IQD · 3% on 10,001–100,000 · 1.5% above 100,000 — marginal, like tax brackets: a higher price never pays a lower fee.

Item price (IQD)	Cheapify fee (IQD)	Effective rate
5,000	250	5.0%
10,000	500	5.0%
25,000	950	3.8%
45,000	1,550	3.4%
100,000	3,200	3.2%
150,000	3,950	2.6%
350,000	6,950	2.0%
1,200,000	19,700	1.6%

Appendix

Unit economics per order

Per 25,000 IQD order (Duhok city)	IQD
Platform fee	+950
Delivery margin (3,000 charged − 2,500 courier)	+500
WhatsApp notifications	−90
Login codes (OTP)	−25
Returns	−20
Failed-delivery re-attempts	−200
Kept per delivered order	**+1,115**

Break-even (monthly costs 652,000 IQD after launch, incl. a capped 225,000 incentive pool)

Case	Kept per order	Break-even orders / month
Base case	1,115	~585
Courier contract not signed	615	~1,060
Average order 20,000 IQD	965	~676
Incentive pool doubled	1,115	~787

Appendix

Three growth scenarios

Scenario	Orders by month 6	Lowest cash point	Monthly break-even	All losses recovered
Fast (2× plan)	2,700 / month	−$1,800 (month 2)	Month 3	Month 6
Planning	1,350 / month	−$2,180 (month 3)	Month 4	Month 8
Slow (half of plan)	675 / month	−$2,750 (month 6)	Month 7	~Month 20

Includes 1.7M IQD startup costs and two build months before launch. USD at 1,500 IQD.

Appendix

Survey: what 199 people told us

Shoppers (179)

97% notice price gaps on the same item (39% often see large gaps)

88% would use a side-by-side app · 10% maybe · 2% prefer DMs

Top annoyances: untrusted / duplicate pages ~52% · found it cheaper after buying ~47% · DM just to ask the price ~46% · delivery delays ~27%

~52 usable beta-waitlist contacts

Merchants (20)

85% sell on Instagram / Facebook

75% would try Cheapify · 15% maybe (depends on commission) · 10% no

Top headaches: “price?” DMs 55% · price conflicts 45% · cost of own app/site 35% · manual delivery coordination 35%

~8 valid pilot-store leads

Limits: self-selected sample; only 10 Kurdish-language responses; stated intent is not purchases — the hand-run pilot measures real behavior.

Appendix

Six documented price cases

Product	Lowest	Highest	Gap	Where
Anker power bank 25K 165W	90,000 (Instagram)	200,000 (Miswag)	+122%	Instagram, iBazzar, Miswag
ASUS VA24EHF monitor	135,000 (Elryan)	163,350 (Miswag)	+21%	Elryan, Miswag
Hoco HX80 coffee maker	25,000 (Instagram)	35,280 (Miswag)	+41%	Instagram, Miswag
Newal 2000W vacuum	95,000 (Instagram)	133,250 (Miswag)	+40%	Instagram, Miswag
Xiaomi 165W power bank	60,000	70,000	+17%	Same app (iBazzar)
Coffee machines (two posts)	—	—	No price shown	Instagram: “call / DM to order”

Screenshots Sep–Oct 2026; Instagram posts dated Apr–Oct 2026.

Appendix

Top risks and how we handle them

Risk	How we handle it
Buyers and sellers bypass the app	Low fee (~3.8%), no contact details on parcels, credits and ratings count only on-platform
Slower growth than planned	Plan is already conservative; half-speed case capped at ~$2,750; hand-run pilot tests demand before spending
Courier contract delayed	Registration first (budgeted); second courier quote as fallback; without the margin, break-even ≈ 1,060 orders/month
Failed deliveries ("not at home")	One free re-attempt; 3 failures remove cash-on-delivery; WhatsApp reminder before delivery
Courier holds the cash	Contract fixes custody and timing; weekly settlement

Appendix

How an order flows

1. **Checkout (cash on delivery)**
2. **Merchant accepts**
3. **Sealed package + waybill**
4. **Courier pickup**
5. **Delivery + cash collected**
6. **Sunday settlement**

Returns: 48 hours — faulty item: merchant pays the return; change of mind: customer pays 3,000 IQD.

Failed delivery: one free re-attempt, then back to the merchant.

Packaging: opaque and sealed; tamper tape on orders ≥ 50,000 IQD.
